

Special Panel of the Advisory Board Report

Manzoor Ahmad

Advisory Panel

- Established 2000
- The purpose is to provide advice over a broad range of issues on medical and scientific matters and collaboration with institutions in developing countries.
- Its functions are different from those of the INCTR's Governing Council, which has ultimate fiscal and legal responsibility for the INCTR.
- Meetings Anually

Advisory Panel Role

- INCTR's medical and scientific activities, and how they might be optimally extended
 - through the establishment of new strategy groups or special committees
 - Through interactions with other organizations, including government agencies.
- The structure of INCTR's strategy groups and committees.
- To seek Institutions and Individuals in developing countries who may have contributions to make to INCTR's programs and projects
- New initiatives or organizational strategies that might be considered.

Advisory Panel Role

- Potential sources of funding, including sources within developing countries themselves.
- The selection of recipients of INCTR's awards.
- The program of INCTR's Annual Meeting
- Any other issue falling within the medical and scientific domain that the panel wishes to address.

- **Study of the problem and how to make changes.** **Dr Ahmad Elzawawy**
- **Cancer Awareness and Screening Program/Early detection**
 Dr Manohar Lal Shrestha

A Tribute to Retiring Members

Dr V Shanta

The journey has been long. I don't see an end to it, simply because our work is never ending. What we have done is very little. There is much more to do. The journey has been arduous, with bricks and stones and occasional flowers strewn in between, but we continue

A Tribute to Retiring Members

- Dr Ketyun Dinshaw

- Between the hospital and the research centre, we are strongly positioned to provide leadership in all areas of medical services, education and research. While we have concentrated on providing the best patient service, we are also interested in all aspects of basic and clinical research, and in providing post-graduate training.
